

## INTERNAL RELEASE

### INFOSPECTRUM'S *infoTRAK*™ V 9 MRO SOLUTION GOES LIVE AT AVIALL, A BOEING COMPANY

Aviall Inc, a wholly-owned subsidiary of The Boeing Company, has successfully gone live on *infoTRAK*™ software to improve the inventory management of their parent company's POSEIDON P8 Material support military programs.

**Los Angeles, CA October 15, 2011** – [Infospectrum](#), a leading provider of Asset Management & Operations and Maintenance, Repair & Overhaul (MRO) solutions and services, announced today that Aviall Inc, a wholly-owned subsidiary of The Boeing Company and a world leader in providing parts and aftermarket services to the aerospace, defense and marine industries, has successfully gone live on the latest version 9 of the *infoTRAK*™ software to improve the inventory management of their parent company's POSEIDON P8 Material support military programs.

*infoTRAK*™ MRO v.9 is a web based solution with Enterprise deployment option or an “on-demand” Software as a Service (SaaS) hosted model. The Rich Internet Application has intuitive screens, personalized pages, real-time alerts and events, mobile & wireless devices interfaces as well as a shop-floor touch screen kiosk interface. It is built around Service Oriented Architecture (SOA) which allows clients to deploy only the modules that are needed with an out-of-the-box and straightforward integration with disparate systems.

Kyle Clark, Government Program Manager for the P-8 project at Aviall, said “This is a huge improvement for the P-8 . . . The rollout of this system, on such a short timeframe, was impeccably organized/managed and went off without a hitch”.

Commenting on the successful deployment, Suresh Iyer, Infospectrum President said “We are happy to be a part of Aviall's goals of use of technology for exemplary service. Infospectrum looks forward to a long partnership with Aviall and being a key element of their growth strategy. The P8 was an ambitious project with a very short (3 months) implementation window and we were able to meet that challenge”.

*infoTRAK* modules that are currently deployed at on the program are:

- Inventory Management
- Work Order Induction Processing
- Repair & Overhaul Survey Inspection, Repair and Rotable Support processing Purchasing
- Work Order Stating

--more--

- Inventory Financials
- Visibility, Monitoring, Statusing, and Reporting Services
